-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

This is the first Office Action for the serial number 10/772,916, PARTS RETAINING PANEL AND METHOD OF MOUNTING AND SECURING PARTS, filed on 2/5/04.

Election/Restrictions

Applicant's election of group I (apparatus) in the reply filed on 7/27/05 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-5, 10-13 are rejected under 35 U.S.C. 102(b) as being anticipated by US Patent # 4,770,399 to Sosson et al.

Sosson et al. teaches an assembly (figure 1) comprising a parts-retaining panel (1) and a set of cooperating parts (2-4). The panel being removable from the parts when the parts are mounted in operative relationship in the mechanism/engine (M). The parts-retaining panel includes a plurality of retainers (2a,3a) protruding from a face thereof. The retainers holding the

parts on the panel. The panels include a plurality of through holes (8-9) through which fasteners (10-11) are inserted therein. The panel is recyclable (plastic material, col. 3, lines 18-19).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 6-9 and 14-17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sosson et al. in view of US Patent # 5,685,441 to Calfee.

Sosson et al. teaches the recyclable panel (plastic material, col. 3, lines 18-19) having a plurality of corners but fails to teach the plurality of corners having a leg. Calfee teaches the panel (13) having plurality of corners with leg (16,18,20). It would have been obvious for one of ordinary skill in the art at the time the invention was made to have added leg to Sosson et al.'s panel as taught by Calfee to provide support for the panel to maintain in upright direction when mounted on the other panel and provide clearance between the two panels when the parts are retained in the panels.
